

CRANE TRUCKS FOR HIRE

Crane Truck #17 PK33,002 EH-G

EFFICIENCY AND VERSATILITY

STARK BROS transport division operates four crane trucks. These trucks work throughout Canterbury lifting tanks, concrete panels, gib and other materials into buildings, pumps, and a huge range of items as required.

Crane trucks are very efficient. They are quick to set up, work in smaller spaces than a traditional crane, have full remote control — so no dogman needed, no counter-weights and the Fly-Jib provides extra versatility.

Our crane truck operators are all fully trained and certified, and will provide skilled execution of the job at hand. We also have man cages available to provide inspection, work platforms as required, in addition to the craneage and placement of items.

We offer a custom service and specialise in short call work. We can lift only, lift and transport, or just transport. Our business is based on service and no job is too big or too small.

Crane Truck #7 PK92002SH-G
